

COMPANY PROFILE

CCI OF ARKANSAS was established in 1995 with the primary focus only on voice & data installations. With CCI becoming quickly recognized in the local market for excellent quality and professionalism, it was soon realized that our customers would need more diversity such as electrical and telecom needs.

CCI now offers more turn-key systems by offering a broader range of services. Over the years, CCI has established and maintained a wide customer base that demands and expects nothing short of quality, flexibility and value. This is what we strive for . . . Customer Satisfaction!

With a wide selection of services and over 75years of combined managerial experience, CCI can provide a spectrum from small service calls to major renovations and new construction.

Our customer base consists of small, private businesses, large corporations, educational institutions, state and federal government, restaurant and retail establishments.

CCI of Arkansas is ready to handle your next project . . . Let us prove our professionalism and commitment to providing the highest quality workmanship guaranteeing customer satisfaction!

ELECTRICAL

Since 1998, CCI has been providing competitive electrical contracting for the commercial industry. With over 75yrs of combined experience you can be reassured that you will get only the highest quality of electrical services from CCI. Our electrical division has been so successful that it now makes up over 60% of our annual sales.

With an excellent team of select, licensed electricians, CCI can offer maintenance contracts, pole lighting repairs, building remodels and new construction. Our

electrical estimators can provide competitive proposals ranging in any size and our project managers work in coordi-

nation with general contractors, architects and owners to ensure that our part of your project is completed on schedule and to expectations you should expect.

CCI owner Tony Lee is a Master electrician by trade since 1974, and personally ensures that all our electricians are licensed, worthy, dependable, and that all installs meet and exceed the current NEC standards and codes. CCI is also a member of the International Association of Electrical Inspectors and Arkansas Builders & Contractors Association.

COMMUNICATIONS

Since incorporation in 1995, communication services has been a key service offering to our customers. CCI is ready to bring your phone and data system up to speed with the rest of the fast-paced business world.

With a combination of a Registered Communications Distribution Designer (RCDD) and BicSi certified technicians to install or upgrade your network, you can be sure it will always perform it best.

Partnerships with industry favorites such as Leviton, Siemon and AMP allow CCI to provide warranties that can extend out to the lifetime of your network, that's real value over the years.

CCI has an experienced Erate staff that can assist you in getting proposals submitted within the narrow filing window each year. Our staff will be ready to complete and assist with required documents and eligible services to ensure you receive the best product and installations for your school.

In 2007, CCI completed it's first major wireless lan installation. This installation combined seven buildings and provided almost 100% coverage for wireless users. With top-notch security features and graphical interface, Aruba Networks combines powerful equipment options and excellent end-user abilities for any level of IT person to appreciate.

TELECOM

In today's face paced economy, one key to successful business is the ability to communicate fast and efficiently with your customers and associates.

CCI offers very dependable and affordable phone systems to assist with your business needs .

CCI has very reliable and trained staff servicing and installing many different types of systems and tech support is just our phone number away.

Enjoy the convenience of a telecom maintenance contract and have peace of mind when it comes to your phone system operating correctly and with ease. Contracts can be provided based on your individual requirements and can be provided on any size phone system.

How about an IP Phone? We can assist you with that too!
