

# ELECTRICAL

Since 1998, CCI of Arkansas has been providing competitive electrical contracting for the commercial industry. With over 80 years of combined experience you can be reassured that you will get only the highest quality of electrical services from CCI. Our electrical division has been so successful that it now makes up over 60% of our annual sales. From small service work to large projects, we have an excellent team of select, licensed electricians to service all your electrical needs. President Tony Lee, a Master electrician and license holder since 1974, personally ensures that all his electricians are licensed, worthy, dependable, and that their installs meet and exceed the current NEC standards and codes.

**Service Division** Our service work ranges from current clientele service needs, tenant finish-outs, or remodeling. For those customers needing frequent service, we offer maintenance contracts that ensure all service needs are handled in a quick and efficient manner. Service and maintenance are available for all commercial sites, and with two-bucket trucks in our fleet, with 30' and 50' reach capability, you can rely on us to provide affordable and reliable pole lighting services and aerial outside plant installs. We also proudly hold for the third year, a maintenance contract with the North Little Rock School District for all their district-wide electrical, communications and telecom services.

## **Construction Division**

For larger projects ranging from complete renovations, additions and new constructions, our estimators can provide competitive proposals. Our construction division has established excellent reputation with several local architects and general contractors. Our project managers work in coordination with general contractors, architects and owners to ensure that our part of your project is completed on schedule and to the expectations that are required. Some of our more recent work completed includes the renovation of Wakefield Elementary, Fort Chaffee New Armory, Camp Robinson Warehouse #327 and Crestwood Elementary, to name a few.

# COMMUNICATIONS

CCI of Arkansas has been providing network cabling services since we incorporated in 1995. Our staff, with a combined 75+ years in the communications industry, is ready to bring your phone and data network system up to speed with the rest of fast-paced business world. With a Registered Communications Distribution Designer (RCDD) on staff and BICSI certified technicians installing and upgrading your network, you can be sure it will always be performing its best. We can make your office network run efficiently, smooth and easily managed with quality products and correct installation. Some of our recent completed work includes University of Arkansas at Monticello Fiber Upgrades, Arkansas School for the Blind Network Cabling, and Fort Chaffee Information Transport System.

**Certified Installations** – Our certified BICSI technicians can install, troubleshoot and service any network system. Our partnership with Leviton can provide you company with a lifetime warranty on a new installation for a worry-free network. Other certified partnerships include Siemon, Amp, and Hubbell. With all our **Certified Installations** of Amp, Leviton, Comscope, Seimon and Hubbell systems; we can offer up to **lifetime warranties** on C-5e, C-6, wireless or fiber to desktops. Call about our maintenance contract

**CCTV Systems** – Due to the growing security needs for many businesses, CCI also offers Closed Circuit Television products and installation. We have been installing CCTV systems for four years and the positive benefits of moving from tape systems to digital are vast. With options such as remote access, you can conveniently check on your business or office anytime and stacks of videotapes are things of the past. A digital CCTV system is probably more affordable than you realize, and the benefits and capabilities of a reliable digital CCTV system have satisfied our customers ranging from small business owners to the specialized surveillance needs at the Little Rock Air Force Base.

# CCI OF ARKANSAS

## History

CCI of Arkansas was established in 1995 with a primary focus on voice and data cabling. The company quickly became recognized as a leader in the local cabling industry for its excellent quality and professionalism. CCI decided to expand their services and products to meet the growing technological needs of businesses in our fast paced economy. CCI of Arkansas now offers more turn-key style systems for our customers by providing a broader range of services such as electrical and telecommunications.

## Quality Customer Service

Over the years, we have established and maintained an extensive customer base that demands and expects nothing short of quality and flexibility. Above all, we strive for **Customer Satisfaction!** Thus, CCI offers **24/7 emergency services** to all of our customers. Our satisfied customer base consists of small privately owned and large corporate businesses to education institutes, government organizations, restaurants and retail establishments.

## Experience

With a vast selection of services and over 100 years of combined managerial experience, CCI can provide a spectrum of services for your projects from small service calls to major renovations and new construction. Our staff is appropriately trained in each division and we keep on top of updates in all the industries we service. We pride ourselves in providing great benefits to our employees, thus having happier employees and longer tenures give the customer reliable, quality service.

The Contractors Licensing board has rated CCI of Arkansas for a 2.5 million bonding capacity, and we also have certificates available for all state insurance requirements.

CCI of Arkansas is ready to assist you in the completion of your next project...  
Let us prove our **quality, professionalism** and **commitment to customer satisfaction**  
by helping you achieve your goals!
